Status of Application

1. Applicant's amendment, filed August 21, 2006, has been entered in the application. Claims 108-138 are now pending, with previously pending claims 82-107 being canceled.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the clutch engagement decrease associated with a second predetermined speed difference beyond a first difference (claims 108, 109, 110, 120, 132, 138) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claims 108-138 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 108, 109, 110, 120, 132, 138 refer to

control of a clutch engagement based on a first predetermined difference in speed values, and then continue to recite a further control based on a second predetermined difference in speed values. The specification and drawings as filed fail to teach the use of a second value as claimed. Applicant's specification, at page 36 refers to the determination of a difference in speed and comparison with an allowable threshold and the ramping up of clutch engagement, and pages 39-40 present a table with exemplary speed difference thresholds but fails to teach different thresholds for initiating increase and decrease of clutch engagement. Page 41 refers to the use of a single set-point threshold value, and page 44 refers to the ramping down of clutch engagement - but fails to refer to a second value which applicant now claims. Page 45 of the specification refers to the use of the same values for clutch engagement ramping up and ramping down.

Claims Not Rejected over the Prior Art

4. Claims 108-138 are not rejected as being either unpatentable over or anticipated by the prior art of record, however they are not in condition for allowance at this time in view of the rejections under 35 USC §112, first paragraph.

Response to Comments

5. Initially, the examiner notes that applicant has not specified the antecedent basis in the application as originally filed for the newly added claim limitations. Applicant has argued that the previously applied reference to Miller et al. fails to teach each and every limitation of the claims as now amended. The examiner agrees, however the claims as amended do not find support in the application as filed, and as such are not in condition for allowance.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3618

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
